

Financial Burden of Cancer

Understand the various costs related to cancer care and create a plan for managing them, keeping records, and seeking financial assistance, if needed.

TRY THIS

Get health insurance. If you do not currently have health insurance coverage, research the plans that are available to you and enroll in the one that best suits your needs.

Know your plan. Understand your premium, deductible, out-of-pocket costs, and what is covered by your insurance.

Seek financial assistance. Talk to your health care team about getting connected to a professional who can help you explore your options.
